

# Mir Asim Ali

9849407125 | mirasimali2003@gmail.com | [www.linkedin.com/in/asim-ali-b5977b228](https://www.linkedin.com/in/asim-ali-b5977b228)

## Education

---

### Bachelor of Engineering, Computer Science — Osmania University

2021 – 2025 | Hyderabad | GPA: 7.8/10 (expected) | Relevant Courses: ML, NLP, Deep Learning

### Intermediate (MPC, 12th) — Sri Chaitanya Junior College

2019 – 2021 | Hyderabad | Scored 8.3/10 | Math & Physics Focus

## Technical Skills

---

- **Programming:** Python, TensorFlow, PyTorch, OpenCV, Scikit-Learn, Java, C, C++, Javascript, HTML, CSS, SQL
- **ML & AI:** Deep Learning, Computer Vision, NLP.
- **Data Science:** Pandas, NumPy, Matplotlib, Data Preprocessing, Image processing
- **Tools & Frameworks:** Git, Jupyter Notebook, APIs, LangChain

## Experience

---

### Machine Learning Intern (Tech Team)

#### CVIT Lab, IIIT-Hyderabad

Nov 2024 – Present

- Developed and integrated a script identification module for printed, handwritten documents in multilingual OCR pipelines, deployed via IIIT-H's public iLoch API platform
- Endpoint: `identify_script_asim_code_layout_postprocess`
- Worked on bilingual and multilingual script separation for Indic languages, using deep learning models (CNNs, ResNet based) trained on custom datasets.
- Conducted extensive model training, validation, and dataset cleaning, addressing data overlap issues and layout-specific challenges.
- Participated in weekly research and engineering meetings, contributing to design, debugging, and deployment decisions.
- Collaborated with CVIT researchers to benchmark models using datasets like MDIW-13 and layout-aware document analysis techniques.

### AI/ML Intern

#### iHub-Data, IIIT-Hyderabad

Jan 2024 – July 2024

- Built and trained a custom YOLOv8 object detection model to identify and track owls in images/videos.
- Integrated and deployed ChatGPT API locally, enabling efficient conversational AI experimentation without cloud dependency.
- Worked with Hugging Face Transformers for fine-tuning and evaluation of pre-trained language models.
- Completed weekly hands-on assignments and research notebooks, covering:

Convolution, pooling, padding, kernel size & transfer learning, Forward/backward propagation and loss functions, Gradient descent, perceptron, regression, clustering, RNNs, Probabilistic ML models and neural network training, Gained practical exposure to Colab, PyTorch, TensorFlow, and modern ML workflows.

## Projects

---

- **Script Separation (Indic Scripts):** Trained bilingual/multilingual ML models for word-level script ID; deployed via IIIT-H's iLoch API.
- **ChatGPT Web API:** Created a simple web UI integrated with ChatGPT API for local inference.
- **Rescue Bubble:** Full-stack disaster relief web app with chat, resource sharing, and agency management.
- **Emotion Classifier:** Scraped Reddit for 5 emotions, built a model to predict emotion and extract key contributing phrases.
- **Owl Detection (YOLOv8):** Trained a YOLOv8 model to detect owls using a custom dataset. and more

## Achievements & Extracurricular

---

- Training program on AIML at IIIT Hyderabad
- Amazon Web Services(AWS) Academy AI-ML Virtual Internship
- Google Digital Garage – The Fundamentals of Digital Marketing
- Attended 10+ hackathons, driven by a strong enthusiasm for rapid prototyping, and creative problem-solving.
- Organized first ever hackathon at my college with the team, which was a great success.
