---

## PROFESSIONAL SUMMARY

Machine Learning Engineer with experience in building, deploying, and optimizing AI and ML systems using deep learning, NLP, computer vision, and large language models. Skilled in end-to-end ML pipelines, feature engineering, model fine-tuning, API integration, and scalable deployment workflows. Strong communication, technical writing, and documentation skills with the ability to collaborate across research and engineering teams.

## EDUCATION

### Bachelor of Engineering – Computer Science

Osmania University, Hyderabad | 2021 – 2025

Relevant Coursework: Machine Learning, NLP, Deep Learning, Data Science

### Training Program – Artificial Intelligence & Machine Learning

IIIT Hyderabad | Feb 2024

## TECHNICAL SKILLS

**Programming Languages:** Python, C, C++, JavaScript, SQL, HTML, CSS

**Technologies & Tools:** TensorFlow, PyTorch, Scikit-learn, OpenCV, YOLO, Pandas, NumPy, Matplotlib, Hugging Face Transformers, LangChain, RAG, Prompt Engineering, Git, APIs, Jupyter Notebook, Data Processing, LLMs

## EXPERIENCE

- **AI/ML Intern — iHub-Data, IIIT Hyderabad (On-site)**

Jan 2024 – Jul 2024 Developed and trained deep learning models for NLP and object detection applications.

Built a YOLOv8- based wildlife monitoring system using custom datasets. Implemented model fine-tuning and evaluation pipelines using

- **Machine Learning Engineer (Tech Team) — CVIT Lab, IIIT Hyderabad (On-site)**

Nov 2024 – Dec 2025 Designed and deployed end-to-end machine learning pipelines for multilingual OCR systems. Developed CNN, ResNet, and Transformer-based models for script identification and post-processing. Built automated workflows for preprocessing, feature engineering, model training, and evaluation. Integrated ML models into production through IIIT-H's public iLoch API platform. Optimized models for accuracy, latency, and reliability in production environments. Collaborated with research and engineering teams on deployment and system design.

- **Summer intern - Open Knowledge Initiative(OKI) IIIT Hyderabad**

May 2026 - June 2026

Working on large-scale digitization and structured archival of Indian language public-domain literature within Wikimedia ecosystems. Implementing OCR-driven text extraction and post-processing workflows using tools such as Tesseract and Google Vision API, followed by linguistic validation, metadata normalization, and Wikisource/Wikidata integration. Contributing to scalable knowledge representation and multilingual content accessibility, with a primary focus on Urdu language resources and digital preservation pipelines.

- **Research Associate - International Institute of Information and Technology Hyderabad (IIITH)**

June 2026 - Present

Working on a funded project on OCR post correction methodologies for Urdu language specifically. Studying the Urdu datasets and doing core analysis before introducing to the ML pipeline and training LLMs for the post correction.

## KEY PROJECTS

**EduRAG – RAG Pipeline for NCERT Textbooks** Built an end-to-end RAG pipeline using PDF ingestion, embeddings, tokenization, and ChromaDB retrieval. Integrated Groq API with LLaMA3-8B using chunking and prompt engineering techniques

**Script Separation for Indic Languages** Developed bilingual and multilingual models for OCR pipelines. Improved recognition accuracy for printed and handwritten documents.

**Emotion-Aware Keyword Extraction System** Built an explainable NLP model for emotion detection and keyword attribution. Applied the system in mental health and social media analytics.

**Promptly – LLM Chatbot** Developed a lightweight chatbot using Groq API. Enabled seamless LLM integration into web platforms.

you can visit my github to check more project repositories : <https://github.com/MirAsimAli>

**And many other ML projects that I worked while I am in my tenure.**

## ADDITIONAL STRENGTHS

Communication Skills, Technical Documentation, Public Speaking, Team Collaboration, Analytical Thinking.

I also write passionately, which helps me practice my thinking and documenting skills and helps me be a good written communicator
